European Window & Door Hardware
Appealing. Functional. Built to last.

Some of the top names in the window and patio door industry depend on Roto for quality hardware. They know that we’ll provide the style, functionality and durability today’s consumers demand. When you want the best components for your products, put our name behind yours.

Roto Tilt&Turn hardware systems have redefined hardware technology in Europe and become popular in North America.

- Single-handed, effortless turning, tilting, and locking of the window sash have made this one of the most user-friendly window types on the market today.
- Roto Frank is the number one manufacturer of Tilt&Turn window hardware in the industry and Roto NT Tilt&Turn is one of the most successful hardware systems available.

Roto NT hardware features a high level of security, even in the standard version, providing greater burglary protection.

- Additional security components can be easily integrated to suit individual needs for maximum security and protection against break-ins and natural disasters, such as hurricanes.

Roto NT Designo sets new standards in aesthetic design and functionality, allowing a window to be opened to a maximum of 100°. No visible hinges or cover caps allows for unobstructed views.

- An efficient installation process reduces time and expense and increases productivity for installers. Sash weights of up to 150 kg (330 lbs) can be achieved.
- All Roto NT Designo components are perfectly matched with the Roto NT modular system.

Roto hardware features a patented Clip&Fit system, which allows components to be connected quickly and easily in a modular fashion.

- With the patented Clip&Fit system, the hardware is secured in place until screwfixing, which ensures precise installation at the coupling location.
Roto Patio Lift meets the specific requirements that are placed on a Lift&Slide hardware system for PVC and aluminum products.

Optional locking components allow for night ventilation.

Roto Patio Lift hardware is suitable for sash weights up to 300 kg (660 lbs) and sash heights and widths up to 3000 mm (9.84 ft).

The Roto Patio Fold hardware is suitable for timber, timber/aluminum, PVC and aluminum profiles.

It is suitable for sash weights up to 100 kg (220 lbs.) per sash, allows for sash rebate height range of 600 mm (23.6 inches) to 2800 mm (9.18 ft), and a frame external width up to 6000 mm (19.7 ft).

Roto Safe multi-point door locks feature maximum gasket-compression and locks reliably and permanently tight against heat, wind, cold and unauthorized access. Stainless steel options are also available.

Superior security in all applications - for cylinder and handle-operated locks from a backset of 25 mm and larger.

Designed for main, back, escape and panic doors made from PVC, wood or aluminum.

The new Roto Patio Parallel Slide system, featuring effortless retractable openings, is compatible with PVC, timber and aluminum profile systems with sash weights up to 200 kg (440 lbs).

It can accommodate a sash rebate width from 600 mm (23.6 inches) to 1650 mm (5.4 ft) and sash rebate height from 600 mm (23.6 inches) to 2700 mm (8.85 ft).

A large sash retracting distance of 125 mm (4.92 inches) enables usage with the newest high depth sash profiles.
We’re as proud of our reputation for quality, reliability, and customer support, as we are of our two manufacturing plants in North America. For Roto products, please visit www.rotohardware.com.
