

Roto Patio Lift

Roto Patio Lift hardware is for versatile use in wood, vinyl and aluminum Lift&Slide systems.

Features & Benefits

- High-quality roller unit technology
- Roller unit components made from 304 SST
- Rollers made from high quality, innovative vinyl mounted on ball bearings
- 304 SST plus roller unit for additional corrosion protection
- Espagnolette for window and door heights 1,000 mm to 3,100 mm
- Dampers standard for sash weights greater than 661 lbs. (300 kg) to prevent uncontrolled rebound of the handle
- Handles consistent with the Roto Line design allow for a modern and uniform appearance
- Night ventilation strikers available
- Design locking options provide elegant striker solutions
