

## Roto LB08 Lock Bar

Often regarded as the highest performing and highest quality locking system in the market, Roto X-DRIVE casement and awning window locking systems provide superior locking and sealing for improved security and seal against weather.

### Features & Benefits

- Symmetrical, non-handed bar
- Corrosion resistant powder coated finish or 304 SST lock bars can be used in most applications
- Offered in a variety of lock-point configurations
- Adjustable lock pins offer ability to control compression levels after installation
- Patented adjustable (2.2 mm) mushroom head lock pins prevent lock from disengaging from nylon strikers
- Stamped out of rolled wire for superior strength
- Guides are preassembled to the lock bar
- Standard and impact versions available
- Multiple guides available in black or stone color for various profile applications

### Standard Lock Bars
