

## Roto NX

The Tilt&Turn hardware system for windows and balcony doors that's shaping the industry once again.

### Features & Benefits

- Reduced storage and logistics expenditure
- High level of operating convenience and ideal functionality
- Security tilt strikers and security strikers for increased burglary inhibition up to RC3 when closed and RC2 in the tilt position
- Maximum corrosion resistance due to Roto Sil Level 6 surface (class 5)
- For all opening types: Tilt&Turn, Tilt-First, Turn-Only, Tilt-Only, and Multi-Sash

### Hinge Side P for Vinyl

### Features & Benefits

- Added security due to a sash weight of 287 lbs. (130 kg)
- Night ventilation function at a 135° handle position without additional frame component
- Staged taper action (s-shaped link) allows for effortless closing
  - This effect is intensified with large windows
- Stay bearing is flush with the overlap of the sash allowing for more combinations with different window types (for example fanlights)
- Concealed screws and custom color selection for cover caps and surfaces (e.g. titanium powder coating)

### Hinge Side T for Wood

### Features & Benefits

- Increased security due to efficient components
- Up to 330 lbs. (150 kg) sash weight
- Night ventilation function at a 135° handle position without additional frame component
- Staged taper action (s-shaped link) allows for effortless closing
  - This effect is intensified with large windows
- Stay bearing is flush with the overlap of the sash allowing for more combinations with different window types (for example fanlights)
- Contemporary design due to concealed screws and cover caps with an optimized shape, as well as powder coated surfaces in numerous color variants (e.g. titanium powder coating)
