## Roto X-DRIVE OP10 Operating System

Roto's new OP10 is a face mount operator manufactured with the same precision, laser-cut arms as used in OP06 and OP08 operators.

### Features & Benefits

- Fits into aluminum profiles with tight hardware cavities, requiring 1/8" less cavity height than other Roto operators
- Available in both powder coated steel and 304 SST versions
- Features fully sealed housing to protect against the elements
- Split arm, single arm (7.5", 9.5", 13.5"), and awning variants offered in a variety of colors (-00, -03, -12, -70, -71).
- Detachable operator cover caps not required
- Optional gasket and fixing plate available
- Standard #10-24 pre-threaded rear-facing mounting holes for clean look
- Simple window routing options for easy installation
- Color-matched fixed handle with secure set screw
- NAFS certified to AAMA 901 (certificate available upon request)

Eliminating base surface mount protrusion allows it to fit into tighter operator cavities
