

Roto Solid C

Roto Solid C concealed hinge is part of the new, innovative generation of door hinges made specifically for ease of installation and effortless movement of heavy, aluminum doors. With our FixClick function, the door only needs to engage with the pre-installed hinges before clicking into place. This system can support inward and outward opening entrance doors made from aluminum.

Features & Benefits

- Supports up to 308 lbs. (140 kg)
- Opening angle of 110° to ensure the largest possible space in entrance areas
- Fast and simple height adjustment using a central adjusting screw on the lower door hinge
- Left and right sides are symmetrical
 - Allows for fewer parts
 - Reduces logistics and administrative outlay
- Sash frame hinges are packaged separately, reducing installation time
- Uninterrupted gasket level prevents heat loss
- Long service life tested over 400,000 opening cycles
- Neutral colors of black and silver
