

## Roto's Multipoint Lock and New Adjustable Strikers

### Roto's multi-point lock and new adjustable strikers for a 4-point system

- Offers robust hook-style locking points with two opposing primary hooks and an additional outward facing hook 28" from each side of the center line
- Anodized aluminum faceplate and 300 series stainless drive-rail for excellent corrosion performance
- 2-point strike features 1/8" adjustability
- 1-point strike features 1/4" adjustability
- The adjustable strikers are made with 300 series stainless steel plates and a powder-coated zinc housing for superior corrosion resistance
- Compatible with standard 100mm 3-hole US tail-driven system complimented by our complete RotoFasco Secura handle line
- 125mm square drive system is also available

### Advantages of a 4-point sliding patio door system:

- System complemented by the complete line of RotoFasco Secura handles.
- Single thumb-turn lever action extends all four locking points.
- Increased adjustability in top and bottom locking points where doors are more prone to misalignment.
- Mishandling device prevents hooks from being thrown while open to avoid damage to hardware and frame.
- Easy installation because the 4-point is supplied as a one piece assembly.
- Opposing hook facings prevent door panel from being lifted off the track and out of the frame.
- Meets ASTM F842 Grade 40 Forced Entry (1,100 lbs)
- Meets AAMA 910-93 Life Cycle Testing (2,500 cycles)
- Meets ASTM B117-97 Corrosion Resistance (1,000 hrs)

#### Adjustable Single-Point Striker

#### Adjustable Two-Point Striker
