# Glas-Tec Glazing Blocks

### Glas-Tec GL-SV

Standard Glazing

- High load-bearing capacity due to reinforced profile leg system
- Compatible with numerous edge seal compounds for insulating glass
- Resistant to aging
- Temperature resistant

Glas-Tec GL-B

Glazing packer with integrated brake membranes

- Holds without any additional fixing
- Resistant to pressure and capable of bearing loads due to the asymmetrical profile leg system
- Compatible with many edge composite sealing compounds for insulating glass
- Resistant to aging
- Temperature resistant

Glas-Tec GL-IB

Triple glazing packer

- Enables the professional installation of every glazing thickness up to 60 mm
- Optimized for high glazing weights
- Profile leg system and guidance of the ventilation channels is built so that the load transfer of individual panes is ensured everywhere on the packer
- The required vapor pressure compensation in the rebate area is not impaired by the packer
- Compatible with numerous edge seal compounds for insulating glass
- Resistant to aging
- Temperature resistant

EUROKLICK Packer plate system

EUROKLICK Type 3: Easier positioning of the EUROKLICK through the installation aid

- For compensating and aligning in window and door construction and in interior work and dry construction

- Fast, simple compensation during installation by inserting colored EUROKLICK shims accurate down to the millimeter

- Positive, direct load-bearing capacity due to firmly pressing of the supporting structure onto the EUROKLICK in the screw area

- Latch-hooks prevent the EUROKLICK from slipping off the screw
